INDEX TO VOLUME XXVIII.

A.

Acetic acid, 358.
Adams, E., on divisibility of matter, 163.
Agassiz', Prof., great work on fossil fishes, 193.
Air pump receiver, new one, 353.
Alcohol in wines and fermented liquors, 48.
——— of potatoes, oil extracted from, 386.
Allanite of Greenland, 394.
Alps, travels in, 296.
Anatomy and medicine, 79.
Analysis of a fossil tree in Craigleith quarry, 390.
——— of some essential oils, 383.
Ancient mineralogy by Prof. Moore, notice of, 188.
Anhydrous sulphuric acid, 366.
Antimonial nickel, a new mineral, 395.
Apocrenic acid, 121.
Apparatus, various chemical, 263.
Apparent loss of weight of the human body, 198.
Arsenic acid—oxide of iron, an antidote for, 135.
Artificial twin crystals of felspar, 396.
——— oxide of chrome, 396.
Asclepias Syriaca, 380.
Assaying the ores of manganese, 146.

B.

Babbages' calculating machine and constants, 64.
Bache, Prof. A. D., on the meteors of Nov. 13th, 1834, 305.
——— radiation, absorption, conduction, &c. of heat, 320.
Baddeley, Lieut., F. W. on boulders—geological notices—and water cement, 111, 367.
Ball, John, on the geology, &c. of the country west of the Rocky Mountains, 1.
——— on meteorological observations at Fort Vancouver, on the Columbia river, 1832 and '33, 9.
Barage in Egypt, 23.
Beaufoy's, Col. work on nautical and hydraulic experiments, notice of, 340.
Beck, Prof. Lewis C., researches on wines and other fermented liquors, 42.
Belfast Nat. Hist. Society, 369.
Bells' improved air pump receiver, 353.
Biela's comet, 398.
Black rock of Quebec, a good water cement, 113.
Boracic acid of Tuscany, 143.
Botanical communications, 165.
Boue's, A., Mémoires geologiques et Paleontologiques, 366.
Boulders, their buoyancy at great depths in the ocean, 111.
Bourne, A., on the resistance of fluids, 231.
Brandes on shooting stars, 97.
British association for the advancement of science, notice of its meetings for 1833, '34, 55.
Buel, J., on the excrementitious matter thrown off by plants, 267.
Burdie House, Dr. Hibberts report on the fresh water limestone of, 365.

C.

Cabinet of minerals for sale, 400.
Cajeput, oil of, 384.
Canal of Mohammedie, 27.
Carbonate of soda, manufacture of, 143
Carburetted hydrogen in cementation of iron, 362.
Caricography, 270.
Caroline Islands, account of, 114.
Cement, adhesive power of water, 367.
Cementation of iron by carburetted hydrogen, 362.
Chalk formation of the U. States, 276.
Chemistry and mineralogy, 70.
———, notice of Dr. Gales' Elements of, 188.
Chiastolite, 395.
Chile, reality of the sudden rise of its coast in 1822, 236.
Chloride of silver, reduction of, 145.
Chlorine, use in separating nitrogen from ammonia, 360.
Chromate of iron, locality of, 383.
Chrome, artificial twin crystals of oxide of, 396.
Cinnamon, oil of, 385.
Clary, Lieut. R. E., on remarkable parhelia seen at Fort Howard, 304.
Coal mine on Mt. Lebanon, 32.
Cold, extraordinary seasons of, 183.
—— of Jan. 1835, notices of, 177.
Comet of Biela, 398.
Composition and resolution of forces, 85.

Conduction of solids, 320.
———— of water, 151.
Conrad, T. A., on the tertiary strata of the Atlantic coast, 104, 280.
Copaiba, hydrochlorate of balsam of, 384.
———, oil of balsam of, 384.
Copper mine in Spain, 144.
——— ores, roasting of, 145.
Crenic acid, 122.
Creosote, 131.
Crystallographical symbols, new system of, 250.
Croom, H. B., botanical communications, 165.

D.

Dana, Jas. D., on a new system of crystallographic symbols, 250.
Dewey, Prof. C., on Caricography, 270.
—on the conduction of water, 151.
Dewitt, Hon. S., eulogium on, 374.
Draper, J. W., idolatry and philosophy of the Zabians, 201.

E.

Earthquake in Chile, Feb. 1835, 332.
———— Florence, 340.
———— Guatimala, Jan. 1835, 336.
Egypt, notices of, 23.
Ellagic acid, 124.
Erratic blocks of the north of Germany, origin of, 389.
Essential oils, analysis and preparation of, 383.

F.

Featherstonhaugh's, G. W., report on the geology of the elevated country between the Missouri and Red River, 379.
Felspar, artificial twin crystals of, 396.
Fermented liquors, researches on, 42.
Filtration, 150.
Fluids, resistance of to solids, 231, 318.
Food made of wood, 399.
Formic acid, 126.
Fossil fishes, 369.
————, Agassiz' great work on, 193.
——— tree, analysis of, 390.
Foster, Wm. Esq., on an easy method of filling long syphon tubes, 268.
Frogs, introduction of into Ireland, 398.

G.

Gale's, Dr. L. D., Elements of chemistry, 188.
Gallic acid, 124, 358.
Galt, discovery of in Alabama, 276.
Galvanic battery, spark, shock and &c. from, 327.
Gas lights, 147.
Gebbard, J. Esq., on geology and mineralogy of Schoharie, New York, 172.
Geological report, Featherstonhaugh's, 379.
Geological, Society, Dublin, Journal, 1833, and '34, 368.
———— Soc. France, Transactions of, 1833, 283.
———— survey of Connecticut, 381.
Geology and Geography, 72.
Geology of Schoharie, N. Y. 172.
——— of the Atlantic coast, 104, 276, 280.
——— of the country west of the Rocky Mountains, 1.
Geometrical question, 382.
Gold, discovery of, in Canada, 112.
—— of the Urals, 395.
Gorton, Thos., on turnouts in rail roads with flexible movable rails, 248.
Graham, Mrs., on the reality of the sudden rise of the coast of Chile in 1822, 236.
Green, Jas., experiments with the elemental Voltaic battery, 33.

H.

Hare, Prof., chemical apparatus for various purposes, 263.
Heat, new method of producing, 146.
——, radiation, absorption and conduction of, 320.
——, refraction and polarization, Prof. Forbes memoir on, 366.
Henry, Prof. J., on the action of a spiral conductor, 329.
———— spark, shock, &c. from a galvanic battery, 327.
Hibbert's, Dr., report on the fresh water limestone of Burdie House, 365.
Hibiscus palustris or Syriacus, 371.
Hildreth, S. P., meteorological journal at Marietta, Ohio, 1834, 160.
Hydrate of phosphorus, 140.
Hydroboracite, a new mineral, 394.
Hyper-iodic acid, 141.

I.

Ichthyosaurus, 369.
Idocrase in the Isle of Skye, 395.
Idolatry and philosophy of the Zabians, 201.
Iodic acid, process for, 136.
Iodine and oxygen, a new compound of, 141.
Ireland, introduction of frogs and snakes into, 398.
Iron, cementation of by carburetted hydrogen, 362.
——, oxide of, an antidote for arsenic acid, 135.
Isomerism, 356.

J.

Journal of Natural History, Boston, 373
———— Science and Literature of the west of England, 365.

Journal of the Geological Society of Dublin, 368.
Juniper, oil of, 385.

K.

Keely, Prof. Geo. W., on the resistance of fluids, 318.

L.

Lethæa Geognostica—new work by Prof. Brown of Heidelberg, 378.
Lighthouses, oxy-hydrogen illumination of, 355.
L'Institut, Journal général des sociétés et travaux scientifiques de la France et de l'Etrangers, 367.
Lyceum of Natural History, New York, proceedings of, 189.

M.

Magnesian conglomerate, saurian bones in, 389.
Magnetic attraction and repulsion, law of, 370.
Magnetism, 61.
Mahomet Ali, 30.
Manganese, best method of assaying the ores of, 146.
Manganesiate of potassa, process for, 137.
Mantell, G. Esq., Wollaston medal awarded to, 391.
——— museum, visit to by Prof. Agassiz, 194.
Maryland, report on new map of, 379.
Mathematics, 69.
Matter, divisibility of, 163.
Memoires geologiques et palæontologiques, Boué's, 366.
Metagallic acid, 124.
Metorological journal at Fort Vancouver on Columbia river in 1832 and '33, 9.
——— at Marietta, Ohio, 1834, 160.
——— at New York, 1833 and '34, 154.
——— at Penn Yan, N Y., 1834, 187.
Meteorology, evidence of certain phenomena in, 310.
Meteors of Nov. 13th, 1834, 305.
Mineralogy, ancient, 188.
——— of Schoharie, N. Y., 172.
Mineral waters containing organic acids, 121.
Mines of quicksilver, lead and copper in Spain, 17, 144.
Modern geography and history for schools, notice of, 378.
Mole, carnivorous, 168.
Molluscous animals, singular preservation of life in, 355.
Morton, Dr. S. G., on geology of the Atlantic coast, 276.

N.

Natural history, 76.
Nautical and hydraulic experiments, Col. Beaufoy's work on, 340.
Needle ore, 395.
Nile, notice of the river, 28.
Nitrogen, apparatus for separating from atmosphere, 263.
——— from ammonia by chlorine, 360.
——— in organic compounds, process for determining the, 134.
———, phosphuret of, 140.

O.

Observations on solar eclipse, Nov. 30th, 1834, 192.
Observatories, 67, 69, 200.
Opium, 359.
Optics, 59.
Oxy-hydrogen illumination in light houses, 355.

P.

Parhelia, remarkable, 304.
Phloridzin, a new substance, 383.
Phosphate of lime in Infusoria, 386.
Phosphorus, hydrate of, 140.
Phosphovinic acid, 129.
Phosphuret of nitrogen, 140.
Pigment, a new green one for artists, 148.
Piles, new thermo-electric, 397.
Plants, excrementitious matter thrown off by, 267.
Platinum, new compounds of, 130.
——— of the Urals, 395.
Popocatepetl, ascent of, 220.
Potatoes, oil from spirits of wine of, 386.
Purple of Cassius, for staining glass and enamels, 145.
Pyrogallic acid, 124.

Q.

Quick silver mines of Spain, 17.

R.

Rail roads, turnouts in, 248.
Recherches sur les Poissons Fossiles, par L'Agassiz, a large work on fossil fishes, by Prof. L'Agassiz, notice of, 193.
Records of General Science, new journal, 365.
Redfield, Wm. C., meteorol. journal in N. Y. 1833 and 1834, 154.
———, on the evidence of certain phenomena in tides and meteorology, 311.
Resistance of fluids, 231, 318.
Retina, remarks on, 278.
Rise of the coast of Chile in 1822, 236.
—— gradual, of some parts of Sweden, 387.
Rocky Mountains, geology of the country west of, 1.

Rogers, Dr. J. B., experiments with the elementary voltaic battery, 33.
Rose of Sharon, fibres of, 371
Roses, preparation of oil of, 383.
———, stearoptine of, 383.

S.

Sartwell, Dr., meteorol. observations at Penn-Yan, N. Y., 187.
Saurians in magnesian conglomerate, 389.
Schoharie, mineralogy of, 381.
Scientific Journals in Great Britain, new, 365.
Sealing wax, new mode of manufacture, 148.
Sea serpent, 372.
Sharks teeth, 378.
Shells on the New England coast, 347.
Shepard's, C. U., notice of Trans. Geol. Soc. of France, for 1833, 283.
————————, notice of Travels in the Alps, 296.
————————, notice of his Mineralogy, 374.
Shooting stars, 95.
Silver, reduction of chloride of, 145.
Snow, a substance called inflammable, 361.
Soapstone in Vermont, 370.
Society, Geol. Dublin, Journal of, 368.
———————— France, Trans. of, 283.
———— Lit. and His. Quebec, Trans. of, 368.
———— Nat. His. Belfast, 369.
———————— Boston, Jour. of, 373.
Soda, manufacture of carbonate of, 143.
Solar eclipse, Nov. 30, 1834, observations on, 192.
Spain, journey in—mines of, 17.
Statistics, 65, 80.
Steam, ratio between the elastic force and temperature, 363.
Stearine a compound body, 361.
Stearoptine of oil of roses, 383.
Strong, Prof. T., on composition and resolution of forces and statical equilibrium, 85.
Strontianite of Schoharie, 172.
Strontian, locality of, 380.
Sulphuric acid, anhydrous, 360.
Sulphurous acid gas, 360.
Sweden, proofs of a gradual rise of land in some parts of, 387.
Symbols, new system of crystallographic, 250.
Syphon tubes, an easy method of filling, 268.

T.

Tannin in purity, 124.
Tellurium, memoir on, 137.
Tertiary strata of the Atlantic coast, 104, 280.
Thermo-electric piles, new, by Nobili, 397.
Tides, evidence of certain phenomena in, 310.
Titanium, constituent of primitive rocks, 136.
————, volatility of, 136.
Totten, Jos. G., description of shells on the New England coast, 347.
Transactions of the Geological Society of France, 1833, 283.
———————— of the Literary and Historical Society of Quebec, Vol. iii, Part 3, 368.
Treatise on Mineralogy by C. U. Shepard, notice of, 374.
Triphylme, a new mineral, 394.

U.

Ultramarine, preparation of, 144.
Uranite, new locality, 382.

V.

Vancouver, meteorological observations at Fort, in 1832 and 1833, 9.
Vegetable organization, rapidity of, 399.
Vesuvius, destructive eruptions of, Aug., 1834, and April, 1835, 199, 340.
Volcanic eruptions and earthquakes, 199, 332, 340.
Voltaic battery, experiments with, 33.
Volumescope, for analysis of the atmosphere, 264.

W.

Wallace, Dr. W. C., on the retina, 278.
Water cement, 113, 367.
———, conduction of, 151.
———, maximum density of, 357.
———, purification of, 150.
West of England Journal of Science and Literature, 365.
Wines, researches on, 42.
Wollaston Medal, 391.
Woodruff, Samuel, Esq. on the mole carnivorous, 168.
Wood, to make eatable food of, 399.

X.

Xiloidine, a new vegetable principle, 131.

Z.

Zabians, idolatry and philosophy of, 201.
Zaffre, new mode of preparing, 147.
